Journal of Neuroscience Methods, 32 (1990) 257–258
Elsevier

Contents of Volume 32

Number 1 – January 1990

Research papers

A new method to study regeneration in vitro of the adult frog sciatic sensory axons
M. Edbladh, P. Remgård and A. Edström (Sweden) 1

Real-time spectral intensity analysis of the EEG on a common microcomputer
C.E. Williams and P.D. Gluckman (New Zealand) 9

Labelling neurons with fluorescent dyes administered via intravenous, subcutaneous or intraperitoneal route
S.-K. Leong and E.-A. Ling (Singapore) 15

Reversible neural inactivation by cooling in anesthetized and freely behaving rats
S. Campeau and M. Davis (U.S.A.) 25

Application of fast cyclic voltammetry to measurement of electrically evoked dopamine overflow from brain slices in vitro
D.R. Bull, P. Palij, M.J. Sheehan, J. Millar, J.A. Stamford, Z.L. Kruk and P.P.A. Humphrey (U.K.) 37

Computer-aided analysis of polarized neurite growthEffects of applied electrical fields on neuronal development
R.J. Cork and A.M. Rajnicek (U.S.A.) 45

Fabrication of a metal-cored multi-barrelled microiontophoresis assembly
M. Hellier, P. Boers and G.A. Lambert (Australia) 55

A chemically-defined medium for organotypic slice cultures
C.M. Annis, J. Edmond and R.T. Robertson (U.S.A.) 63

A miniature, rechargeable, cordless electrocautery for neurosurgery
R.S. Schmidt and W.R. Hudson (U.S.A.) 71

A simple perfusion system for measuring endogenous retinal dopamine release
C.J. Gibson (Canada) 75

Number 2 – February 1990

In vivo staining of the mammalian retina by means of a simple fluorescent method
M. Del Cerro, L.Q. Jiang, S.J. Wiegand and E. Lazar (U.S.A.) 81

An algorithm comparing the two mononuclear curves of choice reaction times in pigeons
C. Kusmic and P. Gualtieri (Italy) 87

New triple microbore cannula system for push-pull perfusion of brain nuclei of the rat
X. Zhang, R.D. Myers and W.R. Wooles (U.S.A.) 93

A rapid procedure for the analysis of phenylalanine in brain tissue utilizing electron-capture gas chromatography
J.T.F. Wong, P.R. Paetsch, G.B. Baker, A.J. Greenshaw and R.T. Coutts (Canada) 105

A method for separation of superimposed electromyographic responses in man
G. Holl and M. Straschill (Germany) 111

Applicability of fixed brain slice for ultrastructural study
C.-S. Lin (U.S.A.) 117

Psychophysical methods for study of sensory-motor behavior using a food-carrying (hoarding) task in rodents
I.Q. Whishaw, S.D. Oddie, R.K. McNamara and T.L. Harris (Canada) 123

New method of transplanting purified glial cells into the brain
C.T. Montgomery and J.A. Robson (U.S.A.) 135

A multiwire microelectrode for single unit recording in deep brain structures
D. Jaeger, S. Gilman and J. Wayne Aldridge (U.S.A.) 143

An easy method for impaling cells using the micromanipulation technique
A.L. Perez-Samartin, L. Martinez-Millan and F. Doñate-Oliver (Spain) 149

A new precise microcomputer based rotometer
S. Pons, J.A. López, C.R.B. Planas and R. Rial (Spain) 155

Neurogenic inflammation in the airways: characterisation of electrical parameters for vagus nerve stimulation in the guinea pig
M.G. Belvisi, P.J. Barnes and D.F. Rogers (U.K.) 159

Letter to the Editor 169
L. Quintin (France)

Corrigendum 171

Announcement 173

Number 3 – March 1990

Physical and chemical considerations in the in vitro calibration of microdialysis probes for biogenic amine neurotransmitters and metabolites
T.J. Parry, T.L. Carter and J.G. McElligott (U.S.A.) 175
The use of ^{3}H standards in ^{125}I autoradiography
R. Artymyshyn, A. Smith and B.B. Wolfe (U.S.A.) 185
Quantification of tremor with a digitizing tablet
R.J. Elble, R. Sinha and C. Higgins (U.S.A.) 193
Measurement of atactic and paretic gait in neuropathies of rats based on analysis of walking tracks
H. Wiethölter, S. Eckert and A. Stevens (F.R.G.) 199
A technique for eliciting muscular reflex responses using position controlled dc motors
G. Holl and M. Straschill (Germany) 207
Simultaneous visualization and electrophysiology of corneal A-delta and C fiber afferents
D.L. Tanelian and M.B. MacIver (U.S.A.) 213
Supravital staining of murine brain with methylene blue according to the Cajal method: a simple and reliable preparation technique for embedding in paraffin
T. Müller (F.R.G.) 223
Membrane ultrastructure preservation and membrane potentials after isolation of rabbit retinal glial (Müller) cells by papain
A. Reichenbach, H. Wolburg, W. Richter and W. Eberhardt (G.D.R., F.R.G.) 227
A 'puff and advance' technique for visually controlled staining of turtle retinal ganglion cells
J. Ammermüller, G. Gulloff, R. Normann and H. Kolb (F.R.G., U.S.A.) 235
A new speculum electrode for electroretinography
P. Lachapelle and L. Blain (Canada) 245
